

SAMIscreed® flexible, durable asphalt repair mastic:

- Crack and spall repair for roads, highways, bridge decks, parking lots, driveways and commercially-trafficked surfaces
- Repairs on paving joint raveling and shoulder separations
- Rumble strip remediation
- Build America Buy America Act compliant
- Meets ASTM D8260 Hot-Applied Mastic physical properties

Fast open to traffic:

Cures rapidly and is ready for traffic when cool, usually within 30 minutes.

No temperature limitations:

Installs in extreme cold or heat so repairs can be made day or night, and year round.

Concrete protection:

Resistant to water intrusion, deicing salts, and other organic materials.

Flexible and resilient:

Flexes with movement from traffic load, vibration, thermal expansion and contraction.

SAMIscreed

SAMIscreed is a hot-applied, flexible asphalt repair material. It is formulated with highly-modified asphalt binder premixed with small aggregate, graded filler, steel fibers and recycled tire rubber. Unlike traditional hot-pour crack sealers, SAMIscreed provides more structural integrity to repairs. Due to its flexibility, SAMIscreed doesn't crack under the stress of freeze-thaw cycles and vibratory movement. It is a true one-part, screed-applied mastic suitable for all types of bituminous repairs. Post-application skid resistance meets or exceeds surrounding surfaces.

SAMIscreed: 40 lb/meltable bag (48 bags/pallet)

Topping Aggregate: 100 lb/bag (30 bags/pallet)

Typical Truckload: 20 to 22 pallets SAMIscreed; 1 to 2 pallets Topping Aggregate

SAMIscreed Installation:

Use a hot air lance to clean and dry area to be repaired. Mill or jackhammer preparation may also be used.

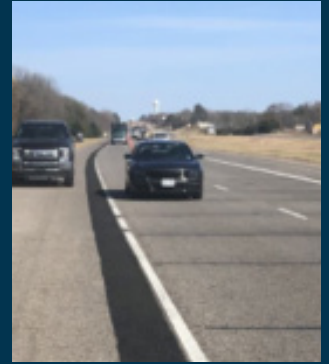

Heat SAMIscreed in a mastic kettle, pour and screed molten material in defect.

For deep repairs, add bulking stone and apply SAMIscreed in multiple lifts.

Apply optional topping aggregate and allow SAMIscreed repair to cool and reopen to traffic, usually within 30 minutes.

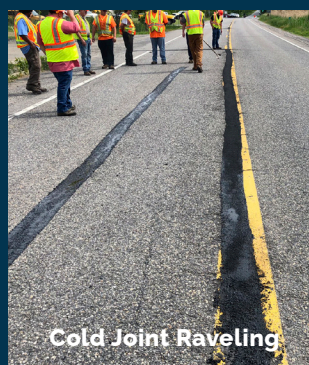

Use SAMIscreed for:

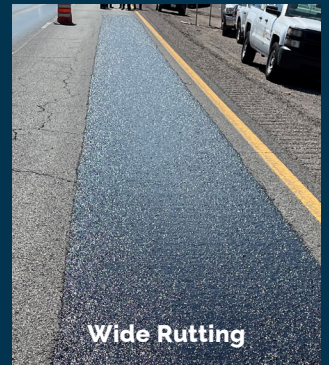

Spalls

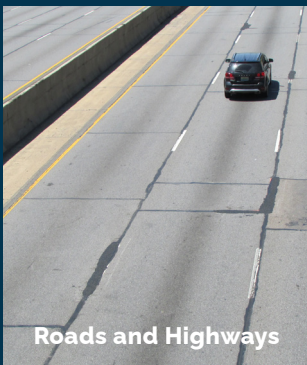

Wide Cracks

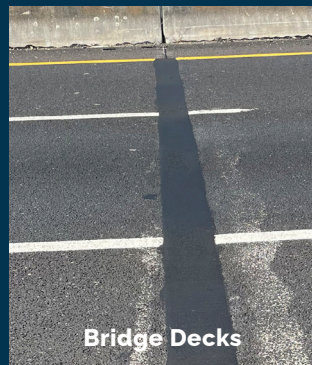

Cold Joint Raveling

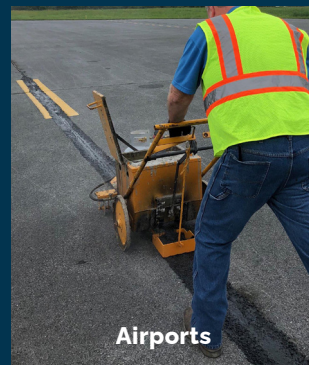

Wide Rutting

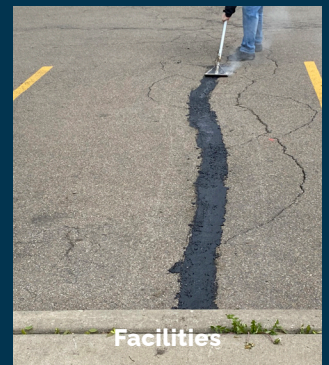

Roads and Highways

Bridge Decks

Airports

Facilities

Interested in SAMIscreed? Contact us to schedule a demonstration. We'll install SAMIscreed in your prepared pavement to show what an effective preservation solution it is.
